Tableau de Bord
for Italy, Romania,
and Spain

Circular Economy Scoreboard for EU27+UK countries

N.B.: all data are referred to the latest available year (2018).

Circular Economy Scoreboard - progress made over the period 2014-2018

Circular Economy Scoreboard Pillars

Sustainable inputs

Using renewable energy and recyclable, recycled and biodegradable materials to manufacture goods and provide services in consecutive lifecycles

End-of-life

Recovering end-of-life value of asset, products and materials through reuse, remanufacturing and recycling

Extension of useful life

Extending the duration of the useful life of products/services

Increase of the intensity of use

Increasing the load factor a single item

Sustainable inputs

End-of-life

Extension of useful life

Increase of the intensity of use

N.B. Data are referred to latest available year (2018)
Source: Eurostat, 2019

Variations calculated from 2014 to 2018.

1 Ratio of the circular use of materials to the overall material use.
2 Utilized Agricultural Area.
